Mike – I'm not sure how much you want/need. If all you want are results of any sampling – I would suggest starting with the 8/3 e-mail – NE wetcake question. Within it is a link to NDEE website for the facility and all of the data NDEE has acquired will be there. The gw monitoring results that were recently provided are provided in an e-mail above and labeled as such. There is also an e-mail above that contains some stream monitoring results provided by UNL to OPP as a part of a complaint.

I included a note I'd shot to Erin. I'm not sure if NDEE has followed up with her on any of the questions but may be worth touching base with her in case she started some work on some similar questions.

As general interest, I included an article published by some UNL researchers on general issues related to the neonics.
